

CLEANSKIN[®]

SAFETY DATA SHEET

Section 1 **Material identification and supplier**

Product name	CLEANSKIN [®]
Other names	No other names
Product Code	C2
Laboratory file	AP001
Document released	July 2002 – New Format
Current update	April 2014
Summary	Cleanskin [®] is a cream-white, free-flowing, homogeneous blend of alkaline particulate solids and food standard & environmentally enhanced surfactants.
Suggested use	In a cleaning regime with an aqueous CIP spray-washing system to remove wine tartar residues, fresh protein, colour and all other organic soils from stainless steel and all other associated hard surfaces.
Company	AIRD - Innovations in Chemistry [™] Wine Industry Support Enterprises Pty. Ltd. ACN 099 644 416 Telephone + 61 8 8285 9100 Fax + 61 8 8285 7099 E-mail info@airdchemistry.com Postal 7 Belfree Drive Green Fields South Australia 5107 Emergency Telephone - Australia 0417 894 682

Section 2 **Hazards identification**

Classification	IRRITANT (Xi)
Risk phrases	R36/R37/R38 Irritating to the eyes, respiratory system and skin
Safety phrases	S2 Keep out of the reach of children S36/S37/S39 Wear suitable protective clothing, gloves & safety glasses
Poisons schedule	Not applicable

Section 3 **Composition and information on ingredients**

A mixture from	Functional sodium alkaline salts Proprietary chelate Proprietary non-phosphated sequesterants Proprietary biodegradable surfactant - from plant derived and renewable substances
----------------	---

Section 4

First aid measures

First Aid facilities	Eye and hand washing station
Ingestion	<p>The solid and its aqueous solution have a mildly caustic action. It is likely to cause a sore throat, diarrhoea, abdominal pain, nausea & vomiting. Rinse the mouth with water. Give water to drink. Do not induce vomiting. If vomiting occurs wash out the mouth with water provided the victim is conscious. Seek immediate medical advice.</p>
Eye	<p>The dust and particles are likely to cause eye irritation, and extended granular contact will cause severe optic irritation, although permanent eye damage is not expected. Immediately irrigate with copious amounts of water for at least 15 minutes while holding eyelids open. Seek Medical advice if irritation persists.</p>
Skin	<p>A moderate skin irritant. Repeated or prolonged contact with rubbing of granules of this material may lead to local redness, rash and dermatitis on sensitive skins. Wash affected skin with plenty of soap & water. Remove any contaminated clothing & wash before re-use. If irritation persists seek Medical advice.</p>
Inhaled	<p>Repeated or prolonged inhalation of dust will cause sneezing and coughing. The vapours or mists from strong aqueous solutions may also irritate the mucous membranes & respiratory tract in some people. Remove the victim from the source of exposure to fresh air. Allow the patient to assume the most comfortable position. Keep the patient warm until fully recovered. Seek Medical advice if coughing persists.</p>
Advice to Doctor	Treat symptomatically as for weak alkali exposure.
Health effects	From available information, no adverse effects are anticipated from repeated over- exposures.

Section 5

Fire fighting measures

Specific hazards	Non-combustible material.
Fire-fighting advice	Decomposes on heating emitting toxic fumes. Fire fighters to wear self-contained breathing apparatus and suitable protective clothing if there is a risk of exposure to the products of decomposition.
Extinguishing media	Not combustible, but if this material is involved in a fire use a water fog or fine water spray, foam, or dry agent such as carbon dioxide or dry chemical powder.

Section 6

Accidental release measures

- Ensure that the cleanup is conducted by trained personnel.
- Avoid creating airborne dusts when recovering spilt material.
- Avoid breathing any existing dusts. Increase ventilation on site if dusts are a problem.
- Wear appropriate protective equipment including boots, safety glasses, chemical resistant gloves and an approved respirator for particulate dust.
- Collect by sweeping or vacuuming, scoop, place and seal material in properly labelled containers or drums for disposal according to the local regulations.
- Wash-down affected area with plenty of water.
- Hard surface aqueous solutions may be slippery.

Section 7 Handling and storage

- Handle all packages with due care.
- Avoid contact with the skin and eyes.
- Store in a dry, ventilated, cool place (10-20°C), and away from incompatible materials and foodstuffs, and out of direct sunlight and away from heat.
- Keep all containers sealed when the product is not in use to maintain quality.
- Check regularly for spillages.

Section 8 Exposure controls, personal protection

Occupational Exposure Limits No value has been assigned for this specific material by Safe Work Australia

Published Safe Work Exposure Standard(s) for particulates. Nuisance dust: 8hr TWA = 10mg/m³

TWA Time weighted average airborne concentration over an 8 hour working day, for a 5 day working week over an entire working life.

These exposure standards are only guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept to as low a level as is workable. These exposure standards should not be used as fine dividing lines between safe and/or dangerous concentrations of chemicals. They are not a measure of relative toxicity.

Engineering Control Measures Ensure ventilation is adequate and that air/material concentrations are controlled below quoted Exposure Standards. Avoid generating airborne dusts.

Personal Protective Equipment Appropriate work clothing and shoes/boots, safety glasses, chemical resistant (PPE) gloves, dust mask/respirator (AS/NZS 1715,1716).

Other protective measures Always wash your hands before smoking, eating, drinking and using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use.

Section 9 Physical and chemical properties

Physical state	Granular powder
Colour	Cream-white
Molecular formula	Not applicable
Melting point	Not applicable
Solubility in water	125 g/L @ 20°C
Specific gravity	1.04 approx.
Particle size	Range 0.05 – 1.0 mm
Flash point	Not applicable
pH	~11.0 - 11.3 (1% w/v aqueous soln.)
Active components	100%

Section 10 Stability and reactivity

- This material is stable when stored and used as recommended.
- As a concentrate it is mildly corrosive toward aluminium and galvanised steel in aqueous solutions combined with a long continuous contact time (bath).
- It will effervesce strongly in contact with an acid.
- This product is hygroscopic.
- Polymerisation will not occur.

Section 11 Toxicological information

No adverse health effects are expected if the product is handled in accordance with this safety data information and the product label. Symptoms or effects that can arise if this product is mishandled are discussed in Section 4 – First Aid Measures as above. The product is an irritant for the eyes and may irritate the skin and respiratory tract.

Long term effects	No information available for this product		
Technological data	Sodium carbonate	Oral LD50 (rat)	4090mg/kg
		Eyes (rabbit)	Moderate irritant

Carcinogenicity	The materials are not classified as carcinogenic.
Mutagenicity	The product is non-mutagenic, non teratogenic.

Section 12 Ecological information

Avoid contaminating the environment with concentrated material. Avoid disposal to natural waterways with concentrated non-neutralized solutions.

Degradability	Aqueous solutions of this product are highly biodegradable (<30days)
Eco-toxicity	In a dilute aqueous solution it is not expected to harm marine or aquatic life.

Section 13 Disposal considerations

Refer to the Waste Management Authority. Dispose of through a licensed waste contractor.

Section 14 Transport information

Label	In accordance with the Safe Work Australia 'Code of Practice' for workplace substances.	
Road/Rail transport	Not classified as Dangerous Goods by the criteria of the Australian Dangerous Goods Code (ADG Code) for transport by road & rail.	
Marine transport	Not Classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea.	
Codes	UN No.	Not required
	DG Class	Not applicable
	Subsidiary Risk	Not applicable
	Packaging Group	Not applicable
	Hazchem Code	None allocated
	EPG	Not required

Section 15 Regulatory information

Classification	This product is hazardous according to the criteria of Safe Work. IRRITANT (Xi)	
Risk phrase(s)	R36/37/38	Irritating to the eyes, respiratory system and skin
	S2	Keep out of the reach of children
	S36/37/39	Wear suitable protective clothing, gloves & safety glasses
Poisons schedule	Not applicable	

Chemical Materials are listed on the AICS.
