

INODOSE™ 2 & 5

SULFUR DIOXIDE TABLETS

ENOLOGICAL APPLICATIONS

INODOSE TABLETS are ideal for adjusting SO₂ levels in barrels and small tanks. They are pre-measured into convenient package sizes (2g and 5g) to make SO₂ additions easier and safer.

- Blend of potassium metabisulfite and potassium bicarbonate (to assist with dispersion and has negligible effect on pH)
- Tablets start to dissolve upon addition releasing a precise dose of total SO₂ (free SO₂ will increase based on conditions)
- Pre-determined dose helps eliminate errors in the cellar
- Sealed strip packages keep unused tablets fresh for optimal efficacy

INSTRUCTIONS FOR USE

Remove tablet from blister pack and add directly to vessel. Larger vessels may require additional mixing to achieve full homogenization.

DOSE RATE

INODOSE TABLETS Conversion Chart (ppm Total SO₂)

SO ₂ Dose	1 Liter	1 Gallon	60 Gallons	100 Gallons	1000 Gallons
2 g	2,000	529	9	5	0.5
5 g	5,000	1,321	22	13	1.3

Note: The tablet sizes (2g and 5g) describe the Total SO₂ dose in each tablet, not the total weight of each tablet. The total weight of each tablet will be more than 2 or 5g due to the weight of the other ingredient, potassium bicarbonate

PACKAGING AND STORAGE

INODOSE™ 2 - 48 tablets/box

INODOSE™ 5 - 42 tablets/box

Store in a dry, well-ventilated environment at temperatures below 77°F (25°C). Once the pack has been opened it should be used immediately.
