

LalVigne® LA

Foliar fertilizer spray

CHARACTERISTICS

Organic foliar fertilizer spray to be used in the vineyard at veraison.

PRODUCT COMPOSITION

Guaranteed Analysis:

Total Nitrogen (N)	8%
7.6% Water Soluble Nitrogen	
0.4% Water Insoluble Nitrogen	
Available Phosphoric Acid (P ₂ O ₅)	2%
Soluble Potash (K ₂ O)	4%

Derived from: Yeast extract

APPLICATION & DOSAGE

- Sprayed on the leaves of the vines by a typical spray machine*
- 1 treatment = 2 applications
- 1st application at 5% veraison
- 2nd application 10-12 days later

Dosage: (per application)

3kg/ha = 2.7lbs/acre

**Note: LalVigne® can be sprayed in the same mixture as other common spray products. Check with Scott Laboratories for compatibility.*

USAGE

Step 1:

Dissolve in small volume of water (10 times). Works best if water is warm (30-40°C/86-104°F). Stir gently.

Step 2:

Add to the spraying machine with 200-600 L (50-160 gal) of water. Apply enough spray to cover leaves, but not so much that it drips off of leaves. Maintain the agitator of the spraying machine during treatment.
