

SELECTION OF SCOTT FILTER SHEET GRADES FOR WINE

Filter Sheet Grade	Nominal Micron Retention Rating	Suggested Uses for Wine Filtration
SE	9.0	Rough-polishing for retention of larger micron-sized particles
SF	8.0	Rough-polishing filtration
SG	7.0	Polishing filtration
SM	3.0	Polishing - clear wine filtration
SR	2.5	Polishing - clarity filtration
SX	2.0	Higher polishing clarity filtration of clear wines
SY	1.0	Higher polishing clarity filtration of clear wines
ST	0.8	Beginning of grades for microorganism reduction filtration.
ST	0.5	Tighter grade for microorganism reduction bottling filtration. Pre-membrane (0.65µm) filtration.
ST	0.45	Tighter grade for microorganism reduction bottling filtration. Pre-membrane (0.45µm) filtration.
ST	0.35	Tighter grade for microorganism reduction filtrations. Pre-membrane (0.45 - 0.65µm) for difficult filtrations.
ST	0.25	Tightest grade for microorganism reduction bottling filtrations. Pre-membrane (0.45- 0.65µm) for difficult filtrations.
